Summary of Changes Effective 1 April 2008

- Fixed Charges have not been varied at 1 April 2008
- MainPower's "Rebate" has not been varied at 1 April 2008
- The above changes will result in an increase in the total cost of Line Service Charges.
For example, for Residential Customers who use 8,000 units per annum the increase represents approximately 9 cents per day or \$2.69 per month.

Notes

- Kaiapoi ICPs refers to those customers who were previously connected to the Kaiapoi Electricity Network.
- A Fixed Line Charge waiver may apply for certain Codes in special circumstances. i.e. when approved by MainPower in writing.
- An approved Fixed Line Charge will apply for a minimum period of 12 months.

Residential Charges

- Storage water heating must be subject to control in order to qualify for Residential Controlled and/or Night Special Supply.
MainPower reserves the right to waive this requirement under special circumstances.
- Night Special is available for approved fixed wired storage water heating, storage space heating and other approved systems.
Supply of Night Special is limited to a maximum of 8 hours between 9.30pm and 7.30 am. Storage water heating is subject to control.
The Fixed Charge for Residential Controlled Supply coupled with Night Special is 30.00 cents per day including GST and before Prompt Payment Discount, (Low User Option 15.00 cents per day).

Charges for Other Supply

- The above Line Service rates for "Other Supply" customers assume that storage water heating and water storage for pumping purposes is controllable by MainPower.
MainPower reserves the right to waive this requirement under special circumstances.
MainPower also reserves the right to charge a higher fixed charge where a waiver is not approved and the customer requests Uncontrolled Supply.
MainPower also reserves the right to charge a higher fixed charge where Power Factor Correction requirements are not maintained.
- Large user customers, i.e. customers consuming over 500,000 units per annum, may qualify for a volume discount.
The level of discount is subject to negotiation between MainPower and each individual customer.
MainPower will take into account a customer's load characteristics and other relevant circumstances.
